

OUR STARTING PROMISE

Briggs & Stratton Corporation warrants to the original owner that select 650 Series engines, 675 Series™ engines, 700 Series™ DOV® engines equipped with ReadyStart™ and Professional Series™ engines* will always start on the first or second pull or we will fix it for free.

The Starting Promise is valid on qualifying products purchased on January 1, 2009 or later. This warranty applies for a period of two years from the date of the original purchase and covers defects in engine materials or workmanship that may prevent the engine from starting on the first or second pull. It includes the cost of parts and labor for repairs related to the starting system. Transportation costs to and from the repairing dealer is the owner's responsibility.

Parts and labor costs of routine maintenance items, such as air filter, spark plug, oil change, fuel filter, and fuel system maintenance, are not covered under this provision. The use of non-original Briggs & Stratton service parts may void this warranty if related to the starting problem.

The warranty excludes special operational conditions that could require more than two pulls, including:

- First time starting after an extended period of non-use or after seasonal storage
- Cool ambient temperature starting, such as found in early Spring or late Autumn
- Failure to follow the recommended guidelines for fuel and oil usage as specified in the operating manual

Engines used commercially are not covered under this provision. All other exclusions of coverage noted in your engine Operating Manual under "About Your Engine Warranty" apply.

Warranty service is available only through authorized dealers by Briggs & Stratton Corporation. Locate your nearest authorized service Dealer in our dealer locator map on BRIGGSandSTRATTON.COM or by calling 1-800-233-3723, or as listed in the Yellow Pages.

* The Starting Promise applies to the following models (U.S. and Canada only): 650 Series models 124T and 124L, 675 Series models 126L and 126T, 700 Series™ DOV® models 1006, 1016, 1008 and 1018, and Professional Series™ models 11P9, 111P, 12Q9, 121Q, 12R9, 121R, 12S9, and 121S.
